

INSTRUCTIONS FOR MAKING HUGGABLES

Turn material right sides together. Pin and cut.

Sewing sing $\frac{1}{4}$ " seams. Leave about 2" opening to stuff huggables. Important – clip curves and right angles to within $\frac{1}{8}$ inch.

To stuff huggables – Stuff firmly but cuddly with polyfil. Hand stitch opening.

For the huggable's eye: double the thread and pull the thread through and knot on both sides. This will achieve an indentation for the eyes.

"Important Safety Instructions: To ensure that the huggable will not pose a safety hazard to the patient or family member with whom it comes in contact, it is imperative that we check and double check to make sure the huggable is free of pins at each stage of production. Remove all pins at the completion of each stage and examine polyfil thoroughly before stuffing the toy.

Please remember, these toys are intended to provide comfort and will be cuddled tightly. A stray pin or needle no matter how small could conceivably cause mild to serious harm. For sewers who smoke, please be aware that some of our patients experience allergic reactions to the smell of smoke. Ideally, we would ask that if possible you refrain from smoking while working on the huggables. Short of that, we do ask that the toys be allowed to air out before delivery to the hospital.

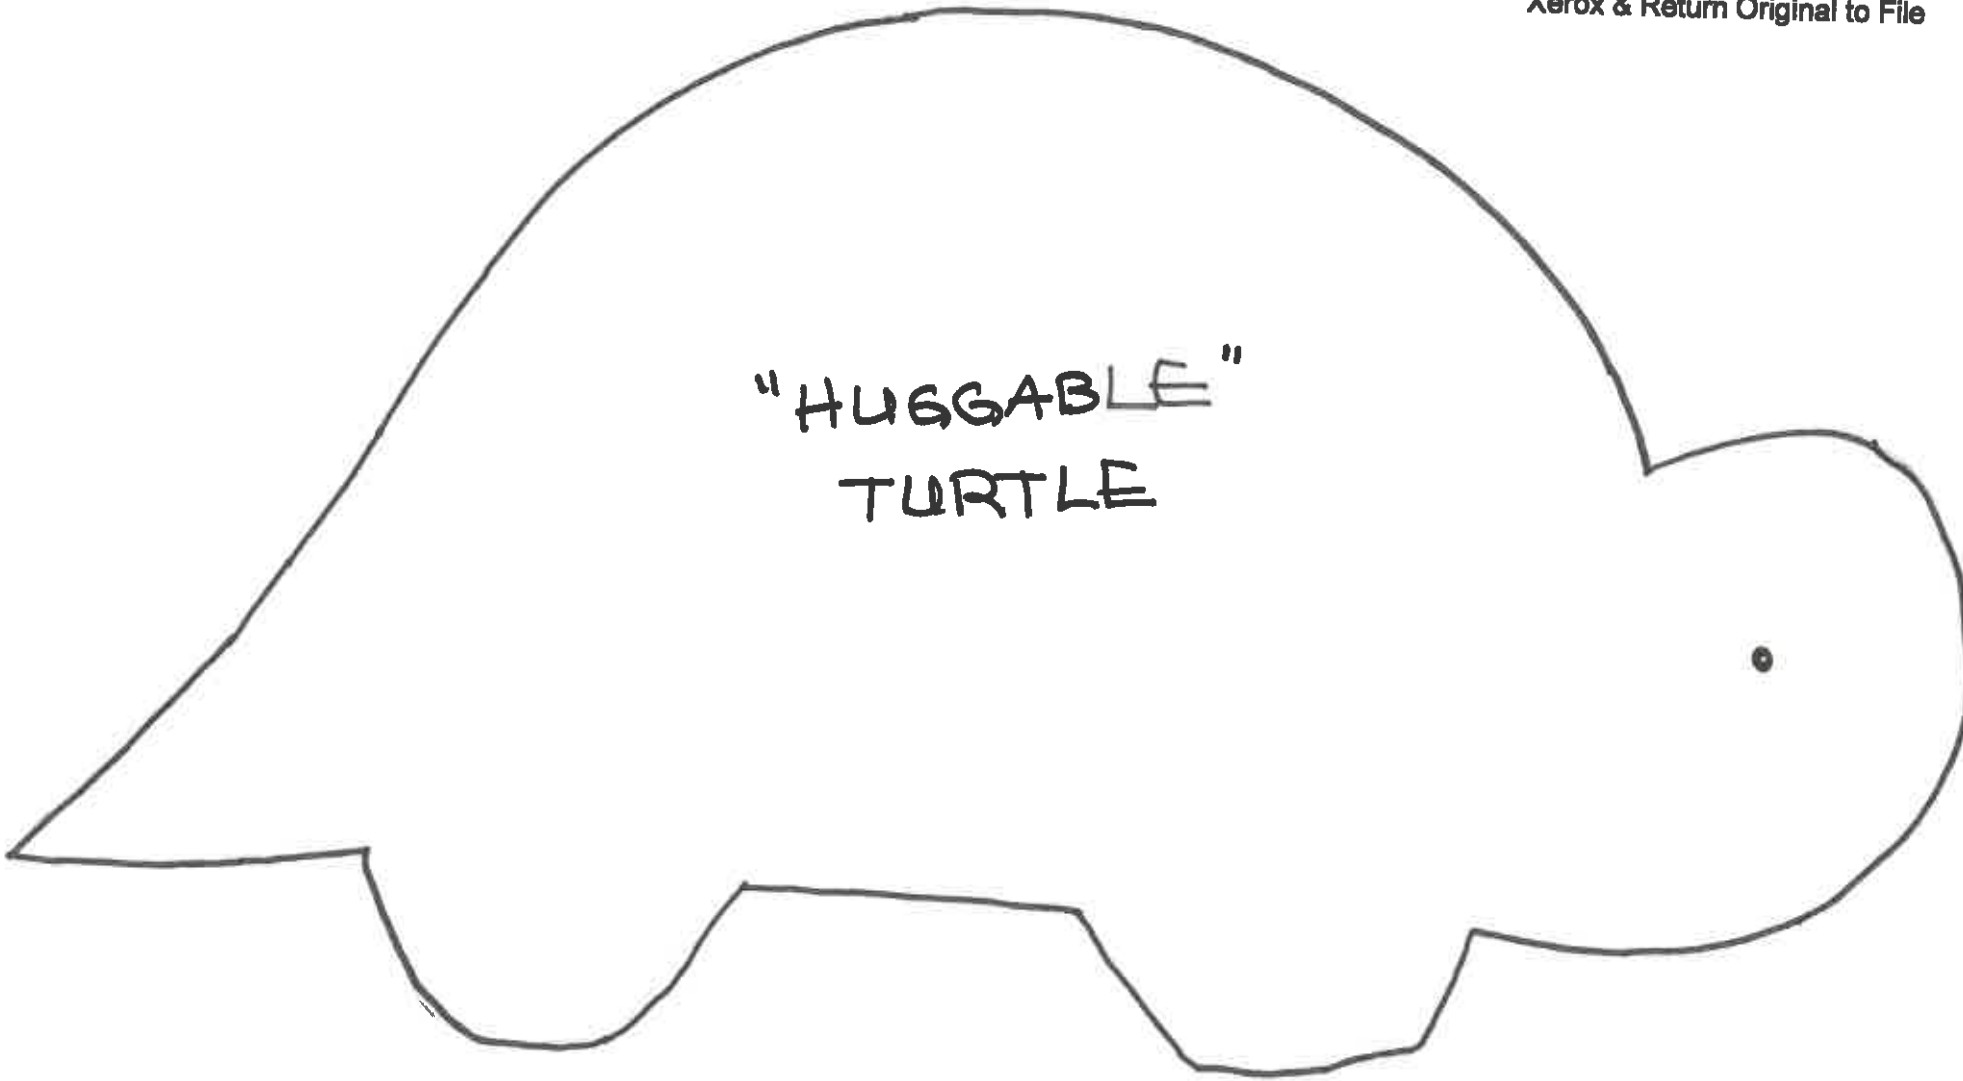

In addition, if you are in need of reimbursement for supplies, you may submit your receipt with the attached completed reimbursement form to the Board of Volunteer Services.

Thank you for your attention to these important safety concerns!
