

TAKE A NEW YEAR'S SELF-HEALTH Audit!

As we enter a new year, WakeMed Primary Care recommends you take a few moments to really think about your body, how you're feeling and what you want in 2023 when it comes to your health.

Spending the time to just think about your health may help you detect problems you haven't consciously noticed, but should probably discuss with a doctor.

Get going by answering some thought-starter questions on the right. Jot down your answers and bring them to your next doctor's appointment.

Working with your WakeMed Physician Practices Primary Care team, prioritize any health concerns you've identified. Together, you can make a plan for improving your health at a pace that works for you. Hopefully, by next year at this time you'll be healthier (and happier) than ever!

HERE'S TO A *Healthy You* IN 2023!
